ABOUT **NTI** BOILERS

We're NTI.

The partner you can trust.

We offer unmatched product quality and service. Our engineers strive to set new standards for high efficiency gas boilers, water heaters and combi furnaces.

NTI is an industry leader and we have been committed to providing smart climate solutions and personal customer support since we were founded in 1967. Today our head office and manufacturing facility are located on the stunning Drury Cove in Saint John, NB, a location chosen to delight those who visit us.

We are not only pioneers in the development of the most advanced and efficient central heating systems, but at NTI we listen to our customers and use their feedback to guide our innovation. Our knowledgeable, accessible friendly staff are here to support every customer to maximize product performance... and just make their jobs easier.

Acknowledged as a leader in research and product development, NTI manufactures its top-quality, hydronic products in accordance with the most advanced guidelines and industry codes. Its products are developed using state-of-the-art design and testing techniques.

The on-site laboratory and training facilities ensure to maintain NTI commitment to enduring quality, product development and contractor support.

Our customer service team, extended warranty programs and unique training opportunities underline our commitment to you. With NTI, you get quality, North American-made products and unparalleled support.

When you buy an NTI product, peace of mind is included.

The NTI brand is the center of excellence for manufacturing and development for heating products, of the Ariston Group in North America.

All over the world, Ariston is synonymous with comfort, energy efficiency and respect for the environment, thanks to its high efficiency products, its plants in compliance with the most advanced production standards and excellent pre- and after-sales customer support services. Our global presence spans 9 operating companies across 40 countries, with 28 production facilities, 29 centers of competence, and R&D operations in 15 countries.

The Group has now a leadership position in the global thermal comfort market for domestic, commercial and industrial spaces. The Group consists of 10,769 employees and, in 2023, it reached 3.09 billion in sales, and produced 8.5 million products.

We love to hear your feedback! Contact us at

to provide your opinion on our products and services

NTI^{net} REMOTE CONNECTIVITY

Wi-Fi on board for remote assistance and monitoring

Most units are equipped with embedded Wi-Fi connectivity so our products can easily communicate with NTI NET Pro, the web platform for remote assistance to make service easier.

With NTI NET Pro service, companies can monitor all their boilers with the NTI NET program.

Step into a new era of customer care with our cutting-edge remote diagnostic system and 24/7 monitoring, placing us closer to our customers than ever before. No more waiting for problems to arise – our system detects maintenance needs and abnormalities, saving time and preventing heating disruptions.

Instant push notifications alert our service teams to any issues, allowing for quick fixes from afar. We proactively review boiler operations ensuring smooth functioning at all times.

Plus, with the ability to adjust settings remotely, we guarantee optimal performance with ease. Our intuitive NTI NET web platform brings all these tools together, offering convenient access to maintenance and service scheduling from anywhere. Accessible from anywhere, it's not just a smart operational choice but also a great business opportunity.

Your route to efficiency and customer satisfaction.

CONDENSING GAS BOILERS

**THE RIGHT SOLUTION
FOR ANY APPLICATION**

CONDENSING GAS BOILERS

FOR ANY NEED

The NTI gas boilers lineup is the widest in the market, allowing our customers to find the right solution for any installation.

Our offering has been designed with our customers at the core of what we do. We are constantly using feedback from the field to guide our innovation. Over the years we have implemented continuous improvements and new features with one goal: your satisfaction.

Here are few of the features that make our boilers unique and allow us to make a difference when it comes to the installation and maintenance of our products:

Top condensing technology

As one of the pioneers to introduce high efficiency condensing boilers to North America, NTI designs only best in class products.

We use only high quality stainless steel heat exchangers to provide efficiency and reliability at the same time.

**TOP
EFFICIENCY
PERFORMANCES**

Legendary ignition

We are known for our quality ignition. All NTI boilers are equipped with an external high-energy spark transformer to ensure proper ignition, each and every time.

120V convenience outlet

Cost effective convenience. Selected NTI products come with a built-in 120V convenience outlet. You can use it to power a condensate pump or just to charge your phone!

Multi-unit cascade function

Connect up to 8 boilers with our integrated cascading function to easily meet even the most demanding installations. No optional devices required.

**INTEGRATED
CASCADE
FUNCTION**

Universal vent connections with embedded test port

Our vent connections include a combustion analyzer test port and can accommodate PVC/CPVC pipes (PP for residential models only and stainless steel for commercial models only) without the need for any adapters.

Outdoor reset sensor included

We make sure you have the right components you need to install our boilers. Our outdoor reset sensor is high quality and field-tested (and is included!).

Note: Not all features available on all products, please consult the model specifications.

TFTN

From 85 to 850 MBH

Supreme Fire Tube:
Residential and light commercial boiler,
Touch screen and Wi-Fi enabled.

FTVN Series II

From 85 to 199 MBH
Combi available 110, 150, 199
MBH

Fire Tube, made simple:
High-efficiency, wall-hung fire tube boiler,
and Wi-Fi enabled.

TRX Series II

From 85 to 199 MBH
Combi available 110, 150, 199
MBH

Superior water tube design;
Improved water tube boiler
design and Wi-Fi enabled.

NTI COMPASS

From 85 to 199 MBH
Combi available 110, 150, 199
MBH

Floor-Standing Superior Fire Tube;
Left or right hand reversible
connections and Wi-Fi enabled.

LX

From 150 to 800 MBH

Floor standing (models 600-800) and
wall mount (models 150-400) Water
Tube; For light to most commercial
applications, the Lx is the ideal option
for high-power heating.

FTG

From 1200 to 2,400 MBH

Floor-Standing Fire Tube:
For heavy commercial applications
delivering maximum efficiency and
reliable heat.

CONDENSING GAS BOILER SELECTION

This boiler selection guide is meant to provide a quick overview of the NTI wide product range. For detailed information about a specific product, please see relevant product brochures and manuals or visit ntiboilers.com

TFTN SERIES

Delivering state-of-the-art functionality and flexibility

TFTN residential and light commercial boilers deliver unprecedented functionality with a proprietary control that is intuitive and easy to program. With Wi-Fi capability, TFTN also features NTI Net that allows remote diagnostic system and 24/7 monitoring. Using the same legendary reliability, quality construction and state-of-the-art technology that were at the heart of the TFTN's predecessor, the TFT, trust the TFTN to deliver.

The TFTN features an impressive, **high-quality 7" color Touch screen** and robust control designed for improved precision and efficiency with easy-to-read graphics. It features NTI's **EZ SetUp Wizard**, designed with input from contractors, to deliver intuitive, and quick set up and performance.

Available in eleven sizes
ranging from: **85 MBH to 850 MBH**

Up to 96% AFUE

Main Features:

- EZ Setup Wizard control
- Large color Touch screen
- NTI Net for 24/7 remote access and monitoring
- Built-in low water cutoff
- Built-in 3-zone control (valves or pumps); can expand to six heating zones with N-LINK
- Top and bottom plumbing connections for easy installation (not applicable on 500-850MBH units)

TFTN Floor Mount - 4 sizes from 500 to 850 MBH

Includes all the features of our wall-mount sizes, but with differences in specifications and performance, connections and switches:

- 97 - 97.7% Thermal Efficiency
- 160 psi MAWP
- 10:1 turndown ratio
- All connections are in the back, including the exhaust and air intake
- Isolation relays for pumps and gas valve/dry contact
- CSD-1 ready with high and low gas pressure switches
- Leveling legs
- Only 28" wide: fits through a standard door

FTVN SERIES II

Fire Tube Boilers Made Simple

The FTVN is a high-efficiency, wall-hung boiler equipped with a **vertical fire tube heat exchanger** made of industry proven 439 stainless steel. NTI's user-friendly programmable display features NTI Net connectivity and onboard Wi-Fi. With easy-to-access components, **simple installation, set up and maintenance**, and its unique design the FTVN enables simpler plumbing layouts that **keep costs well under control**.

The FTVN features a powerful high efficiency ECM pump, to quietly circulate water through the boiler and boiler primary loop, or boiler and indirect water heater loop – AN EXTERNAL DHW PUMP IS NOT REQUIRED.

The FTVN has been designed with service in mind. The components are each easily removable, and the space within the cabinet has been maximized so that your hard working hands have space to work. The swing down control box also enhances serviceability, making all major components easily accessible.

Available in:
85 to 199 MBH

Up to 96% AFUE

TRX SERIES II

The next level of water tube boilers

The TRX is the **advanced NTI platform and the new industry standard** for Combi and central heating applications. The improved water flow design, NTI Net connectivity, and onboard Wi-Fi, makes the TRX the best choice available on the market.

The TRX boiler (central heating) is capable of providing water temps for both space heating and DHW with the use of an external indirect water heater. It provides an internal pump, and diverter valve, eliminating the need for an additional indirect pump and fitting. All internal components utilize bayonet quick connectors, making it one of the fastest products in the market to install.

Components can be efficiently serviced. Swing down control box greatly enhances serviceability, making all major components easily accessible.

Available in multiple sizes:
085 - 199 MBH

NTI COMPASS

Choose your own direction

The NTI Compass is a high-efficiency, floor mounted boiler equipped with a **vertical fire tube heat exchanger** made of industry proven 439 stainless steel. NTI's user-friendly programmable display features NTI Net connectivity and onboard Wi-Fi. With easy-to-access components, **simple installation, set up and maintenance**, and its unique design the NTI Compass enables simpler plumbing layouts that **keep costs well under control**.

The NTI Compass features a powerful high efficiency ECM pump, to quietly circulate water through the boiler and boiler primary loop, or boiler and indirect water heater loop – AN EXTERNAL DHW PUMP IS NOT REQUIRED. Built-in primary/secondary piping makes sure the job's done right. If the system already has primary/secondary piping, just close the internal valve and use the system piping. A true time saver!

The NTI Compass has been designed with service in mind. The components are each easily removable, and the space within the cabinet has been maximized so that your hard working hands have space to work. The swing down control box also enhances serviceability, making all major components easily accessible.

Lx SERIES

When you need more power we've got you covered

For light to heavy commercial applications, the Lx is the ideal option, with its **high power stainless steel heat exchanger**. The Lx Series boilers are designed for floor standing installation and can be also mounted wall-hung up to 399 MBH.

Easily accessible components make it service and maintenance friendly.

Cascade management and other outstanding programming features can be easily controlled by the intuitive touch screen display.

Available in seven sizes
ranging from: **150 MBH**
to **800 MBH**

Up to 94%
Thermal Efficiency

Main Features:

- Touch screen intuitive display
- Wall hung kit included for Lx150-400
- High power sizes up to 800 MBH
- Easy access to the display and internal components
- Advanced cascade settings
- Vents in stainless steel, PVC, CPVC or Polypropylene. (Only directly compatible with PVC, CPVC) Check with local jurisdiction.

FTG SERIES

All the power you need for any commercial applications

The FTG is a **stainless steel high efficiency fire tube commercial boiler** that ranges from 1,200 MBH to 2,350 MBH.

The FTG features a dynamic **multiple heat exchanger design**, with single blower, gas valve and burner. The **user-friendly touch screen display** and **advanced programmable features** make it the ideal choice for dependable and highly demanding commercial applications.

The FTG Series has been designed to provide a reliable source of heat at the maximum energy efficiency levels, without compromises.

Available in six sizes ranging from: **1,200 MBH to 2,400 MBH**

Up to **96%** Thermal Efficiency

Main Features:

- Touch screen intuitive display
- High performance fire tube stainless steel heat exchanger
- Integrated low water cut-off
- Integrated combustion air filter
- CSD-1 compliant
- Advanced cascade settings
- Sealed cabinet
- Vents in stainless steel, PVC, CPVC or Polypropylene. Check with local jurisdiction.

AIR-TO-WATER HEAT PUMP

BETTER FOR YOUR JOB AND
FOR THE PLANET

VERTA SERIES

AIR-TO-WATER HEAT PUMP

Reducing Energy Consumption While Keeping Your Home Comfortable Year-Round.

Introducing the Verta air-to-water heat pump—a smart, energy-efficient solution designed for modern hydronic heating, cooling, and domestic hot water needs. Verta is available in two nominal sizes, 3-ton and 5-ton, making it ideal for a range of residential applications. Both models deliver high water temperatures even in low ambient conditions and feature eco-friendly R32 refrigerant for reduced environmental impact.

Verta offers two user/installer friendly options to commission and control the system: the Control Box (Control32-7), which includes a 7" touchscreen system control for intuitive operation, and the Hydrobox (Hydro32-7), which also features a 7" touchscreen but adds a built-in 3-way valve for domestic hot water (DHW), a PWM pump, and a 3kW electric backup heater. This flexibility ensures seamless integration and optimal comfort for any home.

Scan to watch the NTI Verta Sizing tool in action!

Sizing/Performance App

Delivers smart system recommendations and project specific performance insights, making it easy to understand how to properly select/design your custom Verta application.

Main Features:

- **7" LED Touchscreen System Control**
- **DHW Storage**
Set timer as needed for each day in a week.
- **Heating Curve**
Adjust outlet water temperature based on ambient temperature automatically.
- **High Temperatures even in Low Ambients**
- **Auto Heat Cool Switch**
Heating and cooling can be switched automatically based on ambient temperature or external signal.
- **Equipped with R32 Refrigerant**
- **Limited Warranty**
From installation date:
5 years - Compressor
3 years - All Other Parts

TRIN & STOR TANKS

Highest quality stainless steel indirect water heaters and storage tanks

The Trin & Stor passivated stainless steel **indirect water heaters and storage tanks are renowned for maximum resistance to corrosion, which increases their longevity**. Their **high-quality construction and components** make these storage tanks a popular product, and they come in a **wide range of sizes to fit any need**.

Available in two series with sizes ranging from:
40 gallons to 120 gallons

Main Features:

- Pickled and passivated 444 stainless steel construction
- Simple and quick sensor connection
- Lead free
- High accuracy tank sensor
- Widest product range from 40 to 120 gallons
- Highest quality construction
- Tank sensor
- Aquastat (optional accessory)

S20W HIGH-OUTPUT COMBI SYSTEM

Space saving high-performance wall-mounted indirect water heater

High output is simple when you choose NTI's S20W system:

1. Pair it with one of NTI's heat-only boiler, and 2. **Tie them together with NTI's made-to-measure Plus Kit.**

The S20W is one of our highest performing tanks, with recovery rates that exceed most industry standard 50 and 65 gallon tanks (or indirects). Its stainless steel tank and coil come in a wall-mounted package complete with a metal jacket. **The CFC-free 2" ultra high density EPS insulation ensures low standby losses and each unit comes complete with a thermostatic mixing valve, tank sensor and T&P valve.** A hand hole at the top of the tank allows for inspection and cleaning.

Available in 20 gallons

Pairs with most
heat-only NTI boilers

Main Features:

- Pickled and passivated 444 stainless steel construction
- High quality stainless steel tank and coil, type 444
- CFC-free 2" ultra-high density EPS insulation
- Includes thermostatic mixing valve
- Limited lifetime warranty
- High Output Combi System Plus Kit 3260173
- Tank sensor

Shown here connected to FTVN boiler with NTI Plus Kit (part number 3260173), both sold separately.

INTEGRATED SYSTEMS

EMBRACE A NEW
DIMENSION OF COMFORT

GF150 COMBI FURNACE

Modern Convenience of Hot Water and Forced Air Combined

The GF150 is a merging of our TRX combi boiler with a high efficiency air handler to provide forced-air heating, domestic hot water, hydronic capabilities, and A/C compatible. It is an **all-in-one solution** for the future of hot water, heating and comfort for your home.

The GF150 is equipped with Green Furnace control technology which features the most advanced components, providing whisper quiet heating performance as well as quick and abundant hot water.

One size fits all

95% AFUE

Main Features:

- Innovative technology and outstanding performance
- Combined DHW and space heating appliance
- Most advanced DEC Star ECM blower
- High-efficiency combustion system
- Design innovation
- Integrated plumbing
- Integrated Wi-Fi for remote monitoring and troubleshooting
- Left/right connections
- Qualifies for most boiler rebates/incentives
- 2-stage cooling control using the integrated air handler when coupled with a field-supplied AC unit

WARRANTIES

HIGH-EFFICIENCY GAS PRODUCT LIMITED WARRANTY

Register product purchases at ntiboilers.com.

Retain proof of purchase, installation date and all service records.

To register a product,
SCAN HERE!

A. What Does This Limited Warranty Cover?

This limited warranty covers all parts in your NTI high-efficiency gas product against failure due to defects in materials and workmanship. NTI will replace or, at its sole discretion, repair any defective part. Any replaced part will be warranted for the longer of i) the unexpired portion of the original warranty period or ii) 90 days. Labor and all other costs for the inspection or examination, removal and re-installation of defective parts, and transportation costs for defective or replacement parts, are not covered by this warranty. This warranty applies to all gas units produced on or after Oct. 20, 2021, beginning with serial number 2110202138184177, or those with serial number beginning with 326 or 331.

B. How Long Does the Coverage Last?

Item	Coverage Duration		
	Residential	Commercial	Volume Water Heater
Heat Exchanger (i.e., pressure vessel)	Limited Lifetime	10 years from installation date	5 years from installation date
All Other Parts	5 years from installation date	2 years from installation date	2 years from installation date

For the applicable duration as per the above chart, repair, or replacement of a heat exchanger that NTI has found to be defective in material or workmanship that resulted in a leak will be provided by NTI, provided this warranty has not otherwise been voided. For residential products only, for the years following the first 10 years, NTI will provide coverage for a percentage of the material cost of a replacement heat exchanger according to the following table:

Year from date of installation	Residential % covered by NTI
11th	75%
12th	
13th	50%
14th	
15th and beyond	25%

Coverage will be applied towards the then

current retail price of the replacement heat exchanger. NTI uses its published list pricing to represent current retail pricing. In the case where a replacement heat exchanger is no longer available when the warranty claim is made, NTI will offer a replacement product of similar size and characteristics and any applicable warranty coverage will be applied towards the current retail price of aforementioned product. The amount of coverage toward a replacement product is based upon the percentage of the list price of the heat exchanger on the total list price of the replacement product. For example, if a heat exchanger fails in year 13 of an installation and the list price of the heat exchanger represents 25% of the list price of the replacement product, the warranty coverage applied to the

replacement product would be $50\% \times 25\% = 12.5\%$ of the retail list price of the replacement product. **If the installation date cannot be determined, the warranty period will be considered to begin 60 days from the date the product was shipped by NTI, which NTI can determine using the product serial number.**

C. What Does Residential, Commercial and Volume Water Heater mean?

Residential Products – are gas condensing boilers that meet all of the following four conditions:

1. Below 401 MBH
2. Installed in a housing unit of 2 dwellings or less
3. Not used in commercial applications and process water heating
4. Average annual run time not exceeding 2,500 hours

Commercial Products – all gas condensing boilers that do not qualify as residential products.

Volume Water Heater – products that operate in an open-loop domestic hot water system.

D. How Do You Make a Warranty Claim?

If you believe you have a claim under this limited warranty, please contact a local heating or plumbing contractor of your choice, that is familiar with the operation and service requirement of high-efficiency, condensing products. Your contractor will perform a diagnosis to determine the cause of the issue and will work with NTI Boilers Inc. to establish as to whether you may have a claim covered by this warranty. If your contractor advises you that you may have a claim covered by this warranty, then the contractor can choose to file the claim directly with NTI Boilers Inc. on your behalf, or work through a local wholesale distribution partner of NTI Boilers Inc. You must make all parts that are subject to a warranty claim available to your contractor for return to NTI. If you have questions about this process or the status of your claim, you may contact the NTI Technical Services at 1-800-688-2575, or email info@ntiboilers.com. You can also find warranty details and procedures at www.ntiboilers.com. **All warranty requests need to be approved by the NTI Warranty Department prior to a replacement or credit being issued. Warranty requests must be processed through an approved NTI distributor or authorized party; warranty requests from other parties will not be accepted and NTI will advise to redirect these requests through authorized wholesalers or sales representatives.**

E. What Is Not Covered Under This Warranty?

This warranty is valid only for the original owner at the original location. Additionally, this warranty does not cover claims if the failure, malfunction, or unsatisfactory performance of, or damage to, your Product resulted from or is attributable to:

1. Installation not done in accordance with manufacturer's instructions;
2. Components or replacement parts that are not furnished by NTI;
3. The failure to properly size the product for its use;
4. Repairs or replacement of parts required as a result of poor workmanship of the contractor;
5. Repairs or replacement of parts required due to inaccurate diagnosis and troubleshooting by a contractor that did not include the assistance of the NTI Technical Services Department;
6. Failure to inspect and maintain the venting;
7. Water conditions outside of NTI's acceptable parameters, as stated in the NTI product manuals supplied with the product, including, but not limited to, water chemistry, levels of Total Dissolved Solids (TDS) and pH levels, chemical or electrochemical reaction, water impurities, unsuitable water conditions as per system design guidelines, water treatment chemicals;
8. Sediment, magnetite or scale formation on the water side of the pressure vessel;
9. Operation with contaminated combustion air including, but not limited to, air contaminated externally, air impurities, sulfur or sulfuric action or reaction, dust particles, corrosive vapors, oxygen corrosion;
10. Buildup of dirt, dust or other debris inside the combustion chamber;
11. Installing the product in an unsuitable location or continuing use after onset of a malfunction or discovery of a defect;
12. Information supplied by parties other than NTI without consultation and agreement by NTI;

13. Failure to inspect and service the product in accordance with NTI's product manuals;
14. Freezing, accident, fire, flood, or force majeure, power surges or failures, abuse or misuse, unauthorized alteration;
15. Damages or liability caused by negligent operation, unsuitable or improper use or operation of the product, including, but not limited to, improper installation, incorrect or careless handling, improper start-up, lack of proper adjustment to control parameter default settings, improper control strategy, incorrect combustion adjustment, disregard of the operating and maintenance instructions or any other instructions supplied with the product;
16. Damage to the product or any of its parts caused by matters outside the control of NTI; and
17. Normal wear and tear and/or consumption of parts including, but not limited to, fuses, gaskets, ignitors and electrodes.

If you have any questions about your coverage under this limited lifetime warranty, please contact NTI at info@ntiboilers.com or the Contact Us form at www.ntiboilers.com. Please review all printed material accompanying the product to learn how to properly care for and maintain your product. Additional information may also be found on our website, listed above.

NTI'S MAXIMUM LIABILITY SHALL NOT EXCEED THE ACTUAL PURCHASE PRICE PAID BY YOU FOR YOUR PRODUCT. IN NO EVENT SHALL NTI BE RESPONSIBLE FOR INDIRECT, INCIDENTAL, CONSEQUENTIAL (INCLUDING WITHOUT LIMITATION DAMAGE TO OR LOSS OF OTHER PROPERTY), OR PUNITIVE DAMAGES, WHETHER SUCH CLAIM OR ACTION IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY, OR ANY OTHER LEGAL THEORY.

Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

ALL IMPLIED WARRANTIES ARE LIMITED IN THEIR DURATION TO THE APPLICABLE WARRANTY PERIOD STATED ABOVE. ALL IMPLIED WARRANTIES, INCLUDING MERCHANTABILITY AND FITNESS

INDIRECT WATER HEATER AND STORAGE TANK LIMITED LIFETIME WARRANTY

Register product purchases at ntiboilers.com. Retain proof of purchase, installation date and all service records.

FOR A PARTICULAR PURPOSE, ARE DISCLAIMED IN THEIR ENTIRETY AFTER EXPIRATION OF THEIR APPLICABLE WARRANTY PERIOD SET FORTH ABOVE. Some states or provinces do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

A. What Does This Limited Warranty Cover?

NTI, the manufacturer, warrant that any parts or components of each new indirect water heater or storage tank, will be supplied free of defects in material or workmanship. This warranty replaces any other warranty implied or expressed.

This Limited Warranty covers the tank and all parts in your NTI indirect water heater and storage tank against failure due to defects in materials and workmanship. NTI will replace or, at the sole discretion of NTI, repair any defective part. Any replaced part will be warranted for the longer of i) the unexpired portion

of the original warranty period or ii) 90 days. Labor and all other costs for the inspection or examination, removal and re-installation of defective parts, and transportation costs for defective or replacement parts, are not covered by this warranty.

B. How Long Does the Warranty Last?

Parts Warranty: Two-year limited parts warranty. NTI will repair or replace any component, supplied or manufactured by NTI Boilers Inc., that is found to be defective, for a period of twenty-four (24) months from date of installation, if found to be in compliance with the "Terms and Conditions" of this warranty.

Tank Warranty: Limited lifetime warranty. NTI will, at its discretion, repair or replace a tank found to be defective or malfunctioning, resulting in a leakage of water from the tank, for a period of ten (10) years from the date of installation, and if found to be in compliance with the "Terms and Conditions" of this warranty. For the years following the first 10 years, NTI will provide coverage for a percentage of the material cost of a replacement indirect water heater or storage tank according to the following table:

Year from date of installation	Residential % covered by NTI
11th	75%
12th	
13th	50%
14th	
15th and beyond	25%

Warranty coverage period will commence from the date of installation. If the installation date cannot be confirmed through either the product registration or a contractor's Invoice, coverage will be considered to begin 90 days after NTI shipped the product from its warehouse. This shipping date can be determined by NTI using the product serial number.

C. Terms and Conditions

- This warranty is VOID if:
 - The appliance is not installed and serviced by a licensed and trained heating technician.
 - The installation is not in accordance with this manufacturer's manuals, local codes and regulations.
 - Tank leaks are a result of corrosive effects caused by abnormal water conditions or outside the following water chemistry requirements:
 - Tank water with PH levels outside the limits of 6.0 to 8.0.
 - Tank water with chloride levels (ppm) outside the limits of 0 to 80.
 - Electrical conductivity (EC) exceeding maximum of 125 mS/m @ 25° C
 - Saturation index (LSI) outside the limits of -1.0 to 0.8 @ 80° C
 - Deformation occurs due to freezing, improper storage or handling.
 - Any repairs or replacements made without authorization by or notification to the manufacturer.
- This warranty is valid ONLY to the original owner, at the original installation site. The warranty is NOT transferable.
- The warranty assumes the proper use and care of the appliance and does not cover improper installation, neglect or abuse of the product.
- Tank replacement warranty covers only the tank for leaks caused by corrosive effects of water under "normal conditions" within the water chemistry limits.
- NTI Boilers Inc. is not responsible for reimbursement for labor, fuel or punitive damages caused by the operation or failure of the equipment.
- This warranty does not cover the labor and shipping costs associated with installing a repaired or replaced indirect water heater or storage tank.
- Decision of warranty repairs or replacements to appliances will be at the discretion of the manufacturer or authorized service representative.

D. How Do You Make A Warranty Claim?

If you believe you have a claim under this limited lifetime warranty, contact a local heating or plumbing contractor of your choice, that is familiar with the operation and service requirement of indirect water heaters and storage tanks. Your contractor will perform a diagnosis to determine the cause of the issue and will work with NTI Boilers Inc. to establish as to whether you may have a claim covered by this Warranty. If your contractor advises you that you may have a claim covered by this warranty, then the contractor can choose to file the claim directly with NTI Boilers Inc. on your behalf, or work through a local wholesale distribution Partner of NTI Boilers Inc. You must make all parts that are subject to a warranty claim available to your contractor for return to NTI. If you have questions about this process or the status of your claim, you may contact the NTI Technical Services at 1-800-688-2575, or email info@ntiboilers.com. You can also find warranty details and procedures at www.ntiboilers.com. **All warranty requests need to be approved by the NTI Warranty Department prior to a replacement or credit being issued. Warranty requests must be processed through an approved NTI distributor or authorized party; warranty requests from other parties will not be accepted and NTI will advise to redirect these requests through authorized wholesalers or sales representatives.**

If you have any questions about your coverage under this limited lifetime warranty, please contact NTI at info@ntiboilers.com or the Contact Us form on www.ntiboilers.com. Please review all printed material accompanying the product to learn how to properly care for and maintain your Product. Additional information may also be found on our website, listed above.

NTI'S MAXIMUM LIABILITY SHALL NOT EXCEED THE ACTUAL PURCHASE PRICE PAID BY YOU FOR YOUR PRODUCT. IN NO EVENT SHALL NTI BE RESPONSIBLE FOR INDIRECT, INCIDENTAL, CONSEQUENTIAL (INCLUDING WITHOUT LIMITATION DAMAGE TO OR LOSS OF OTHER PROPERTY, OR PUNITIVE DAMAGES, WHETHER SUCH CLAIM OR ACTION IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, STRICT LIABILITY, OR ANY OTHER LEGAL THEORY. Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

ALL IMPLIED WARRANTIES ARE LIMITED IN THEIR DURATION TO THE APPLICABLE WARRANTY PERIOD STATED ABOVE. ALL IMPLIED WARRANTIES, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE DISCLAIMED IN THEIR ENTIRETY AFTER EXPIRATION OF THEIR APPLICABLE WARRANTY PERIOD SET FORTH ABOVE. Some states or provinces do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

HEAT PUMP WARRANTY

Register product purchases at ntiboilers.com. Retain proof of purchase, installation date and all service records.

A. What Does This Limited Warranty Cover?

This Limited Warranty covers all Parts in your NTI air to water heat pump Product against failure due to defects in materials and workmanship. NTI will replace or, at the sole discretion of NTI, repair any defective part. Any replaced part will be warranted for the longer of i) the unexpired portion of the original warranty period or ii) 90 days.

Labor and all other costs for the inspection or examination, removal and re-installation of defective parts, and transportation costs for defective or replacement parts, are not covered by this Warranty.

This warranty applies to all heat pump units produced on or after October 20, 2024.

B. How Long Does the Coverage Last?

Coverage	Coverage Duration *
Compressor	5 years from installation date
All Other Parts	3 years from installation date

**If the installation date cannot be determined, the Warranty Period will be considered to begin 60 days from the date the Product was shipped by NTI, which NTI can determine using the Product serial number.*

C. How Do You Make a Warranty Claim?

If you believe you have a claim under this Limited Warranty, please contact a local heating or plumbing contractor of your choice, that is familiar with the operation and service requirement of the products. Your contractor will perform a diagnosis to determine the cause of the issue and will work with NTI Boilers Inc. to establish as to whether you may have a claim covered by this Warranty. If your contractor advises you that you may have a claim covered by this Warranty, then the contractor can choose to file the claim directly with NTI Boilers Inc. on your behalf, or work through a local Wholesale Distribution Partner of NTI Boilers Inc. You must make all parts that are subject to a warranty claim available to your contractor for return to NTI.
